

Richard Ejdling

Frontend Developer

I am a recent graduate in web development with experience in creating responsive and dynamic websites using React and Next.js, as well as hybrid mobile apps with React Native. I also have skills in layout, styling, and interactivity, along with a foundational understanding of backend processes such as database management and website deployment.

I am quick to learn new things and approach challenges with patience and persistence. I am comfortable working both independently and as part of a team.

I am now seeking a position where I can contribute my skills and continue to grow professionally.
